

General Case Study Group Exercise

The earth is about to be destroyed. One rescue spaceship, which holds five vacant places, is about to take off.

The following is a list of candidates to board the spaceship: a 70-year-old priest, an accountant and his pregnant wife, a young singer, a psychologist, a medical student, a basketball player, a police officer with a baton, and a government minister.

Please take two minutes to individually select the five people you would recommend to board the ship.

You then have 20 minutes to discuss as a group and reach a unanimous decision on a list of five passengers. Notice that your decision should be agreed by everyone and reached through discussion only. Good luck'.
